

Expanded Customer Service Lineup (2/2)

"Hikari Mobile myPC"

Allows customers to remotely control their personal computers in a thin client environment.

"U-Consent Service"

"PLC Service"

Builds a home LAN using the existing electrical wiring in a house.

"U-Consent Service"

- Turns home electrical appliances into information home appliances using a mobile phone and an Internet connection, such as FLET'S Hikari.

<Allows customers to remotely operate electrical appliances (e.g., "switching on/off operation) at home or monitor their operation with mobile phones while on the move.>

From late May to the end of August 2007 (planned): Test run using test subjects
From September 2007 (planned): Commercial service to be launched
