## (Reference) Outline of V6 Premium Forum

- 1. Forum formation: September 28, 2006
- 2. Number of members (as of October 2007): 134 companies (organizations)
  (12 academic institutions, 102 IT equipment/software venders, 14 IT system installation companies, and 6 service providers including ASP)

## **Providing members with information**

Provide information exclusively to members on the development of the new IPv6 network services envisioned by NTT West, and related business strategies and technical information. This information will be provided to members through partnership meetings, mail magazines, and various seminars

## Inviting inputs and ideas

Solicit members' input and ideas on new business models and technologies that utilize IPv6 networks, and based on these inputs and ideas, promote initiatives to bring about collaborative alliances and commercialization in concrete form

## **Promotion activities**

Demonstrate the services and products created from the Forum in the seminars and exhibitions organized by NTT West, and provide opportunities for members to take part as co-exhibitors with NTT West  Members' special website, and mail magazine

Delivery of useful information exclusively to members

Technical seminars

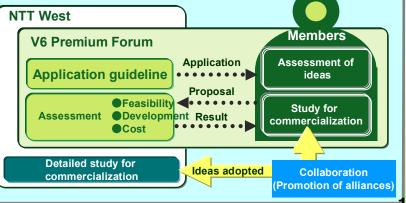

Providing information on the latest technology in small-group seminars

Partnership meetings

Keynote lectures, and information exchange among members

Verification and other endeavors are under way for <u>32 subjects</u> in <u>4 areas</u> (new service development, solutions, new technologies, and free proposals) <u>submitted by 17 members</u>
