

# Promoting Eco-Offices

## Save Resource Program

Reuse/recycling of IT equipment

Energy saving/improved efficiency of network communications equipment

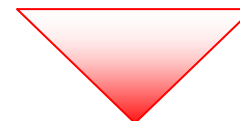

Promoting eco-office activities

Promoting sales of environmental solutions

## Promotion of eco-office activities

- ① Measures for lighting, PCs, air conditioning, etc.
- ② Review of work procedures, office environment

Build model branch office and conduct evaluation

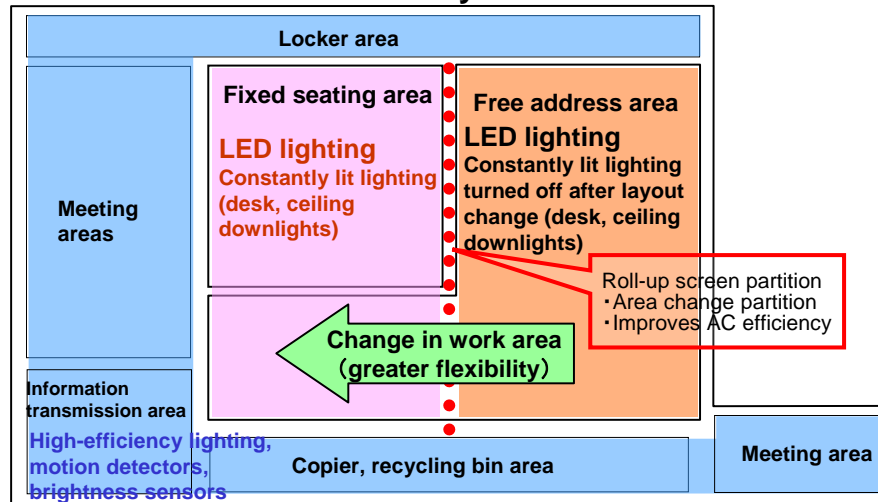

## Build Eco-Office Model Branch Office -- Commence trial in Kobe Chuo Building, Hyogo Branch (Dec.) --

In addition to reducing power consumption by using LED lighting and through making power consumption visible, deploy thin client terminals on the applicable floors and use “hot desking”\* to revolutionize work styles (greater flexibility in work areas)

### Details of Efforts:

- **50% reduction in power usage (lighting, PCs)**
  - Energy saving by introducing LED lighting, motion detectors, brightness sensors and thin client terminals
  - With flexible work areas, save energy with lights and air conditioning
  - Reduction of number of printers and copiers in offices
- **Making energy consumption visible**
  - Conduct energy consumption analysis by area unit (identify the heaviness of the use)
  - Raise employee awareness of environmental efforts
- **Reduce amount of office paper use**
  - Paperless meetings, etc., to reduce paper use
- **Reduction of office waste**
  - Use recycled-material products and recyclable products

### Eco-Office Layout

\* Function by which an IC card or other individual authentication device is inserted into a thin client so that a desktop environment can be created on any terminal
