# Future Roles of NTT West

### Advances in Digital Technology

**Developing environments** to connect to and enjoy.

- Widespread use of information appliances
- ·Launch of various services that use networks

#### What NTT West Can Do

Connect all devices and people through networks

Expertise gained from optical line services

Rich human resources

Brand power that gives customers peace of mind and security

## **Current Environments** at Homes and Offices

Only people with the technological ability are able to connect and enjoy

People want more convenience and comfort, but the methods of achieving this through digital technologies are not well understood

# Creation of new lifestyles

A society where advances in digital technology can help everyone
